Full Stack Developer - Work full-time at Space-Startup LiveEO in the vibrant Berlin Start-Up ecosystem.

At LiveEO you are creating the backbone that enables us to do what we do. Be an essential part of a small team of motivated developers that want to create groundbreaking applications, making our lives safer, easier, more enlightened and ultimately, better.

Our company LiveEO

When you work at LiveEO you work at a space company. There are few things that excite us more than what space technology is enabling us to do, and that is what we are working on when we come to the office every day.

We don't care about borders and value diversity. Spanning 7 nationalities you would join our non-hierarchical team consisting of musicians, sports fanatics, gamers, mate (club- & traditional) lovers and above all New-Space visionaries.

- Remote work is possible on given occasions
- Great team and a great culture
- Flat hierarchies

Your challenge

Work hands-on in shaping and designing the analysis pipeline for big and heavy satellite imagery data sets. Constantly having the mindset of a modular buildup and a clean microservice infrastructure.

Confidently handle and manipulate different machine learning frameworks. CNN and random forest are nothing new for you. If so, you have no problem diving into the material and quickly becoming an expert.

You can deliver against the backdrop of the companies vision of a high-quality, customer-centric and user-friendly product.

Your profile

- Full Stack development
- Implementation of Micro-service architecture

- Experience with Kubernetes and AWS
- API Design & communication
- Python, R
- SCRUM

Interested in this position? Send your CV and a short cover letter to jobs@live-eo.com and we will get back to you as soon as possible.
