

# System Administrator (f/m/x) - Part Time

## Summary:

At LiveEO, we model risk to our customers' infrastructure using machine learning and satellite imagery. In this role, you will be helping to develop self service cloud infrastructure to run machine learning tasks on demand.

## Who we are:

LiveEO is a series A funded startup founded in 2018 and based in Berlin. Our primary service is modelling risk to our customers' assets and infrastructure from vegetation, ground deformation and third party construction using satellite imagery from multiple constellations. LiveEO has customers from the east coast of Australia to the west coast of the US. We currently have 40+ employees from all over the world with a variety of backgrounds.

## Our relevant tech stack:

- Amazon Web Services (AWS)
- Docker
- GitLab
- Linux (Ubuntu) laptops (DEV Team)
- Windows laptops (Business Team)
- Google Workspace (G Suite)
- On-site WiFi infrastructure
- BookStack Wiki
- Slack

## Your responsibilities:

- Installations, continuous maintenance and system administration of all laptops with Linux and Windows operating systems
- Designing and implementing a centrally managed system for system and security updates for laptops and desktops
- Documentation of all Office-IT related practices, policies and setups
- Keep all inventory documents up to date
- Administration of our Google Workspace, BookStack Wiki, Slack and GitLab
- Together with the Infra Team manage AWS accounts

We encourage female applicants and applicants from a variety of backgrounds.

## We offer:

- Competitive salary
- Work with global companies
- Support for personal development
- Build and define your own projects
- Free fresh fruit
- Company events
- Friendly, transparent and supportive work environment
- Flexible working hours and home working
